

Computer Science, Mathematics & Computer Science 2024-25 Admissions Round Feedback

Please note this is subject admissions feedback from the 2024-25 selection round - there will be changes each year, and these pages only provide a general indication of process.

The Computer Science admissions tutors would like to thank all applicants for the time and care they put into their applications. We are also grateful to referees for proving their supporting statements and for the encouragement and support they give to applicants.

Computer Science and Mathematics & Computer Science continue to be among the most competitive courses in the University. The number of applications is considerably greater than the number of places available and, as a consequence, it's not possible to shortlist everyone for an interview. This year, there were 701 applications for Computer Science, 178 of which were shortlisted; 59 offers were made. In Mathematics & Computer Science, there were 620 applications, 181 of which were shortlisted; 89 offers were made. In Keble, the figures for Computer Science were 70 applications, 24 shortlisted, and 7 offers, including an open offer made by a different college and an offer to an offer to a candidate in Mathematics & Computer Science. For Mathematics & Computer Science, there were 49 applications, 10 shortlisted (4 reallocated to other colleges) and 5 offers, including 3 offers made by other colleges. All offers were for 2025 entry.

In their assessment of individual applications, the tutors took account of contextual data concerning relative individual and school performance as well as some background characteristics related to place of residence. This information is available only for applicants from within the UK. An explanation of how the University uses contextual data can be found here: <https://www.ox.ac.uk/admissions/undergraduate/applying-to-oxford/decisions/contextual-data>.

The Department of Computer Science publishes a short annual report on Computer Science admissions. These can be viewed here: http://www.cs.ox.ac.uk/admissions/undergraduate/admissions_statistics/publicReport2023.pdf

The reports include figures for the number of applications, the shortlisting process, and the outcome by MAT score. Individual applicants are sent their MAT scores by the relevant department. A guide to what the tutors in Computer Science are looking for in applicant can be found here: https://www.cs.ox.ac.uk/admissions/undergraduate/why_oxford/what_do_tutors_look_for.html.
