KEBLE COLLEGE

RESEARCH FELLOW AND TUTOR IN ENGINEERING SCIENCE

The College proposes to elect a Research Fellow and Tutor in Engineering Science for a period of four years from 1 October 2022 or as soon as possible thereafter. This is a fixed-term, non-renewable appointment subject to the satisfactory completion of an initial probationary year. Scholars in receipt of another source of income, for example from a post-doctoral position or departmental lectureship and who would like a college association, are welcome to apply.

The research interests of the person elected will be in Engineering Science, interpreted broadly. Some preference may be given to persons whose interests and teaching capacities complement those of the existing Fellows, Dr Felix Leach and Dr Christopher Proctor (from September 2002), with a view to enhancing teaching provision in the College. The post-holder may be asked to help in a limited way with the academic organisation of the subject and will be expected to help with undergraduate admissions. The teaching stint will be four hours per week averaged over the academic year. Informal enquiries may be made to Dr Felix Leach at felix.leach@keble.ox.ac.uk. Further Particulars, including criteria for selection, may be obtained from the here.

The successful candidate will be required to provide documentary evidence of their eligibility for employment in the UK before starting work with the College.

The stipend for the post will be £10, 577 (current rate, reviewed annually). The Fellow will not be a member of the College Governing Body, but will be a full member of the Senior Common Room and be entitled to lunch and dinner at the Common Table as well as to an academic allowance of £704 p.a.. A shared teaching room will be available. The post holder will be eligible to join USS.

The closing date for applications is 12 noon June 23rd 2022. Candidates should submit a curriculum vitae (including the names, addresses and telephone numbers of two referees) and a statement that outlines their previous and planned research activity and their teaching experience to date (including an indication of which parts of the current Engineering Science prelims and FHS courses they might teach) to Mrs Trish Long, Warden’s PA, Keble College, Oxford OX1 3PG (e-mail: trish.long@keble.ox.ac.uk.), and should ask their referees to write directly to the Warden’s PA by the same date.

Applications are particularly welcome from women and black and minority ethnic candidates, who are under-represented in academic posts in Oxford.
