

Guide for Disabled Students

This guide is intended for potential applicants to the College, applicants (undergraduate and graduate) and current students. It provides you with information on all aspects of support for disabled students, including in the application process, arrival in College, accommodation and College facilities, as well as adjustments for examinations. Any student who is diagnosed with a substantial and long-term physical impairment, a social or communication impairment (such as Autistic Spectrum Condition or Asperger's Syndrome), a mental health condition, and/or a Specific Learning Difference (such as dyslexia or dyspraxia) may fall within the definition of disability. This guide contains important information for you.

The information here is correct as of 21st September 2023. This guide will be updated when the information is available, but inquiries can be directed to the Student Support Officer (contact details page 2)

	Students with specific access requirements: policy and procedure

Introduction

[The Equality Act](#) defines disabilities as ‘a physical or mental impairment that has a “substantial” and “long-term” negative effect on your ability to do normal daily activities.’ Around twelve per cent of the students at Keble declare a disability. Half, around thirty people, report a specific learning difficulty such as dyslexia. These levels are comparable with other colleges. What this means is that colleges, including Keble, and departments have good experience of addressing the needs that arise for disabled students. We do, however, also recognise that each person’s needs and circumstances will be different and that there is always more that we can do to make the College a more inclusive environment.

The University has a [Common Framework for Supporting Disabled Students](#) approved by colleges and departments in 2014; the College has a strong commitment to promoting equality of opportunity for disabled students. Two college officers have particular responsibilities:

Dr Alisdair Rogers, is the Senior Tutor (senior.tutor@keble.ox.ac.uk) and he acts as **Disability Lead** with strategic oversight for provision for students with disabilities.

Aimee Rhead is the Student Support Officer (student.support@keble) and the **Disability Coordinator**; her responsibilities include the day-to-day implementation of adjustments and support for disabled students, the implementation of policies and, where appropriate, coordination with departments.

Full information on support offered across the collegiate University is available on the website of the [Disability Advisory Service](#).

Disclosure

You don’t have to disclose if you have a disability. However, there are benefits to disclosing. If we are aware in advance of any particular requirements, we can provide you appropriate support and make reasonable adjustments, including to the admissions process. Applicants who are disabled are therefore strongly advised to contact the University Disability Advisory Service and the College Disability Coordinator in advance to discuss their needs. All such matters are covered by the [Guidance on Confidentiality in Student Health and Welfare](#).

Applicants

The information in this section is addressed at anyone thinking of applying to the University and to Keble, whether for an undergraduate or a graduate degree. There are two main questions: (1) how does the application process take account of particular disabilities and (2) how far can Keble accommodate your particular needs?

The University's policy on admissions is this:

The University of Oxford and its colleges welcome applications from people with disabilities and are committed to making reasonable adjustments to enable students to participate fully in student life.

The University and colleges view applications from students with disabilities on the same grounds as those from other candidates. All applications are assessed purely on academic merit and potential, according to the published selection criteria for the course you have applied for.

Graduate applications are dealt with by Departments in the first instance, although you can express a preference for a particular college on your application form. Information on graduate applicants – including financial support - can be found on the University's website [here](#).

If you can, it's recommended that you try to visit the Department and/or College before making your application. The University has open days, but you can generally arrange visits to suit your schedule. That's not always possible, but at the very least we recommend that you contact the Disability Coordinator to discuss your needs before applying. Please note that:

College reallocation on disability grounds will only be possible in exceptional cases and you will be required to provide supporting medical evidence about your disability and its impact. Normally this kind of reallocation extends only to those with a severe disability that requires substantial adjustments to living accommodation, a significant sensory impairment or those who have personal daily care needs.

You may want to read the section on **Accessibility** below before deciding whether Keble is the right place for you.

Undergraduate applications are handled by colleges in the first instance but it can also be helpful to contact the University early in your planning – go to the University’s website [here](#). There’s a wall of videos in which students with disabilities talk about their experience of Oxford for example.

Because undergraduate admissions generally involve interviews – normally online – it’s important to let us know in advance about any needs arising from a disability. If the subject you’re applying for has a pre-interview test, your school Exams Officer, or open centre administrator can advise you on what to do. If you are shortlisted for interview, reasonable adjustments can be made to the timing, format and conduct of interviews if you’ve given us sufficient notice. That might be via your UCAS application – in which case we will pick it up - or by contacting the Disability Coordinator directly – and in good time.

You may want to read the section on **Accessibility** below before deciding whether Keble is the right place for you. If you think it would help you, we recommend that you visit the College before making your application. There are three Open days in the summer, but if for any reason you can’t make one of them, contact the Disability Co-ordinator and we’ll try to arrange a personal tour.

If you are offered a place at Keble – or at another Oxford college, please contact the **Disability Advisory Service** as soon as possible, without waiting for confirmation of your offer. If you’re a UK student, they can advise you on how to apply for Disabled Student Allowance, which is the main source of government financial support.

If you are offered a place at Keble but applied to a different college, you might want to contact us and – if it’s appropriate – come and see the facilities. We hold a special session for offer-holders who did not originally apply to Keble at one of our early summer Open days (we’ll be in touch with you about that) but if that’s not convenient, contact the Disability Co-ordinator.

If Keble presents difficulties due to your disability, the Disability Advisory Service will work with you and us to establish whether reasonable adjustments can be made to accommodate you. If the situation cannot be satisfactorily resolved you should contact the Undergraduate Admissions Office to request a change of college. Such changes are made only in

exceptional circumstances and you will be required to provide supporting medical information about your disability.

Students on course

Although you are not obliged to disclose any disabilities, we can obviously only help you if you do so. Such things as examination adjustments or adjustments to teaching and learning can take time to implement – they inevitably involve paperwork and can also require liaison within the College, and between the College and departments and the Disability Advisory Service. The sooner you make us aware of any issues or needs, the quicker they can be addressed.

It does also happen that students only become fully aware of disabilities – for example Specific Learning Differences – while on course. If you – or sometimes your tutor – thinks that you might need an assessment, it's sensible to act without delay.

Disability Advisory Service

We recommend that if you have not contacted the University's [Disability Advisory Service](#) (DAS) before making an application or before taking up your offer, that you do so once you arrive. The College works closely with DAS to ensure that the adjustments and support offered is right for you. DAS can assess your eligibility for:

- Teaching adjustments, e.g. lecture capture
- In-person or online support from a study skills tutor or mentor (also known as non-medical help)
- Reasonable adjustments to the built environment, for example in your labs or department
- IT equipment and assistive technology
- Travel allowance to fund study-related taxi journeys
- Adjustments to examinations and assessments
- Adjustments to facilitate access to libraries

The DAS does not deal with such issues as college accommodation, but we rely upon their advice to understand your accommodation requirements. The DAS will write a set of recommendations for adjustments and support in a Student Support Plan (SSP). With your consent, DAS will share your SSP with the College's Disability Co-ordinator who will oversee the implementation of the recommendations.

Adjustments in Course and Examination Arrangements

The University is able to make appropriate and reasonable adjustments to both teaching and assessment (examining) while on course. The College can do the same for college teaching and exams. If you have informed us and University in good time, the relevant Disability Coordinators can meet to agree a statement of support tailored to your individual needs.

Disabled students, including students reporting specific learning differences or a diagnosed medical condition and who need to apply for study or examination adjustments, will be asked to provide medical or other independent, specialist evidence to support their requests for those arrangements. Examinations adjustments are authorised by the University, not the College. A range of exam adjustments may be available to eligible students, including provision of extra time or use of a word processor.

This is important. Just because you had an exam adjustment before you came here, it does not necessarily follow that you'll have the same while at Oxford. It is your responsibility to contact the University's Disability Advisory Service or the College's Disability Coordinator as soon as possible to discuss your eligibility for exam adjustments. The deadline to apply for exam adjustments is week 4 of the term before your exams are scheduled to take place. It may be possible to submit a late application for exam adjustments in some circumstances. Please note that the University may not be able to accommodate exam adjustments that are requested after the deadline has passed.

If an adjustment is agreed for you by the University, we will also apply it to college examinations. But we won't allow you extra time or the use of a computer until and unless that adjustment is agreed by the University for your University exams.

Financial Support

There is some funding available to meet any additional costs arising from a disability. Home students, undergraduate or graduate, may be eligible for Disabled Students' Allowances

(DSAs). These are provided by Student Finance England, Student Finance Wales or the Student Awards Agency for Scotland. Some graduate funding bodies also provide an equivalent to DSA. The University and the College also have funds available to assist students with specific study-related needs. Please contact the Disability Advisory Service for advice on your eligibility for Disabled Students' Allowance.

Accessibility

You are strongly encouraged to consult the [Keble entry in the detailed University Access Guide](#), which has more detailed information (including photographs).

Keble's main site is a combination of 19th century and late 20th century buildings, to which many changes have been made to adapt them to the needs of students and staff with disabilities. The newer H B Allen Centre, where the main graduate accommodation and facilities are located, was completed in 2019 and is generally more accessible but needs improvements. Some parts of the College are more accessible to individuals with specific mobility, visual or other needs than others. There is a rolling programme of improving the buildings to make them more inclusive.

It is a good idea to attend an Open Day if you can or contact the Disability Coordinator.

Parks Road (Main) site

The main entrances and the Porters' Lodge are accessible by wheelchair users. Access to the Lodge is via a manual door. The Lodge has an induction loop.

The Hall is accessible to wheelchair users via a new purpose-built lift. Anyone wishing to use the lift on a regular basis should contact the SCR (catering.supervisor@keble.ox.ac.uk) for training on its use. They will be given a fob-key to activate the lift. Other, occasional users (for example for friends, guests, and family) should speak to the Lodge Porters or contact the Hall Stewards (catering.supervisor@keble.ox.ac.uk) for assistance with operating the lift. There is an induction loop in the Hall.

The Library can be accessed from the ground floor (the main entrance is on the first floor and involves steps) by arrangement with the College Librarians. It may also be possible to arrange books and materials to be delivered to your college room. *See section below.*

The Junior Common Room (JCR) is accessible via removable ramp.

The Middle Common Room (MCR) is accessible by wheelchair users; step-free access is by ramp from Hayward Quad, which is operated by a device obtained from the Porters Lodge.

The Chapel is accessible via removable ramp; it has an induction loop.

The O'Reilly Theatre has wheelchair access and an induction loop

Teaching rooms in the Sloane Robinson Building and ARCO basement are accessible to wheelchair users.

The bar and café is accessible to wheelchair users via a separate entrance.

The gym on the main site is not accessible

Car parking may be available in College for students with disabilities, but it cannot be guaranteed.

The fire safety systems in student rooms can be readily adapted to meet the needs of individuals with impaired hearing or vision.

Accommodation

For undergraduates, there are a number of ground-floor study bedrooms in Liddon quad, all of which have en-suite facilities. There is also one study-bedroom with purpose-built, en-suite facilities, suitable for a wheelchair user; a carer could be accommodated nearby, linked by a telephone. Study bedrooms in Sloane Robinson and ARCO are accessible via lift. All study-bedrooms have data points to both the College and University networks.

We may be able to arrange for you to either stay in or retain your college accommodation outside term-time, provided that it is a reasonable adjustment to your needs.

H B Allen Centre

The facilities in the H B Allen Centre for graduates (completed 2019) have been designed to meet the needs of students with disabilities, although there is still a programme of improvements to be completed. Access to all rooms is step-free although some involve passing through fire doors which are currently manually operated. Thirteen study bedrooms are configured for use by residents with a disability.

Contact the Accommodation Office (accommodation@keble.ox.ac.uk), for further information on the Allen Centre.

Keble Library: Readers with Disabilities

Keble Library is committed to providing the best access possible for all members of College. Readers with disabilities are invited to contact the College's Student Support Officer or the Deputy Librarian directly to discuss their needs before they start their course or at any stage during their time at Keble.

If the staircase presents a problem, arrangements can be made for readers to study in the Lower Reading rooms. Books can be delivered to pigeonholes, left with Lodge staff or delivered directly to student rooms. Disabled users may also nominate a person to check out books on their behalf.

It may be possible to purchase extra copies of books for those for whom it would be difficult to visit other libraries and who find it easier to read in their rooms. On request, the College may be able to supply ergonomic chairs for students with back or neck problems; book/laptop rests are also available.

Permission may be given by the Librarian for a helper, approved by the University's Disability Advisory Service, to accompany a student when using the Library.

Information about the Bodleian Libraries for disabled readers is available on the [Oxford LibGuides site](#). A key point of contact is the [Accessible Resources Unit of the Bodleian Libraries](#) (ARACU), which provides support for students with disabilities and advises on access issues for all Bodleian Libraries. ARACU has a variety of assistive technology – including magnifiers, screen readers, recorders and ergonomic equipment – available for

borrowing or for testing on site. ARACU's manager is also the Bodleian's Disability Librarian (teresa.pedroso@bodleian.ox.ac.uk; 01865 283861).

We want you to make the most of your time at Keble and Library staff will do their best to provide a service that meets your individual needs.

Keble contact: Fiona Wilson, College Librarian, library@keble.ox.ac.uk, Tel: (01865) 272728

Students With Specific Access Requirements: Policy and Procedure

Introduction

This document sets out the policy and procedure for managing adaptations for students with specific access requirements.

It should be read in conjunction with the Common Framework for Supporting Disabled Students, adopted across the collegiate University in 2014. The Common Framework sets out two **guiding principles**:

- i. That the collegiate University will seek to demonstrate exemplary inclusive practice in relation to disabled students.
- ii. That the collegiate University will comply with all applicable legislation¹, and follow the guidance outlined in University policies and relevant external publications, noting the requirement to make reasonable adjustments insofar as they do not compromise the integrity of academic competence standards.

These guiding principles inform a set of **operational principles**:

- i. That the collegiate University will adopt an **anticipatory approach**, in line with requirements of the Equality Act, and think ahead about the range of adjustments that might reasonably be made for potential students without needing reference to individual student cases.
- ii. That the collegiate University will use and further develop efficient **communication systems** to share information about disabled students in order to provide coordinated support. This will be carried out in accordance with the Data Protection Act 1998 and will also recognise the requirement to respect confidentiality and the need for sensitivity during the legitimate sharing of information.
- iii. That the **Disability Advisory Service (DAS)** will play a central role in assessing student need and making recommendations for reasonable adjustments to remove disability-related barriers including working in collaboration with, and providing advice and guidance for, students, colleges, departments and other relevant sections of the collegiate University.
- iv. Each College and faculty/department should designate a senior member of staff to take a lead role in disability-related matters (known as the '**Disability Lead**'). This person should have strategic oversight of provision for disabled students within their college or department and will report to the relevant responsible body...Each college and faculty/department may also appoint one or more members of staff to coordinate and oversee implementation of provision for disabled students (the '**disability coordinator**').

¹ In this case, the relevant legislation includes the Equality Act (2010) and Part M of the Building Regulations (2010)

- v. That a **collaborative approach** will be adopted by those staff supporting disabled students to facilitate the smooth and coherent implementation of reasonable adjustments. Within this collaborative context, the lead responsibility for maintaining oversight throughout a student's studies will be taken by colleges in the case of undergraduates, and by departments/faculties in the case of graduates, in close consultation with DAS.

Disability Lead - Dr Alisdair Rogers, Senior Tutor: ali.rogers@keble.ox.ac.uk

Disability Coordinator – Aimee Rhead, Student Support Officer: student.support@keble.ox.ac.uk

The policy and procedure in this document refer to both residential sites of the College, a Parks Road and the H B Allen Centre.

Identifying students with specific access requirements

Individuals holding offers for either undergraduate or graduate places are invited to disclose disabilities, including specific access requirements, to the Welfare and Disability Officer at the following points:

- Undergraduate application, i.e. on the UCAS form – on which case the College is notified by the Undergraduate Admissions Office
- Invitation for admissions interview – via a paragraph in the letter inviting applicants to interview
- The offer letter to graduates
- The accommodation preference form to graduates accompanying the offer letter
- The accommodation preference form to undergraduates sent in March following the offer
- During confirmation of undergraduate offers, in the August preceding arrival in Michaelmas term

Arrangements during admissions interviews

The College will follow the Disability Advisory Service's good practice guidance on facilitating access to admissions for candidates with disabilities (see appendix 3). The Student Support Officer is responsible for coordinating arrangements for applicants in liaison with the College Office and the relevant subject admission tutors.

Arrangements during the offer stage

The Admissions Officer will notify the Student Support Officer of offer-holders who disclosed disabilities during or after the admissions process.

The Student Support Officer will direct offer holders (undergraduate and graduate) to the Disability Advisory Service. Offer-holders are strongly encouraged to make early contact with the DAS, who in turn will coordinate provision with the relevant University department(s)

The Accommodation Managers will notify the Student Support Officer of incoming students who disclosed disabilities or make reference to specific requirements in their accommodation forms. There is a space on the forms to make such requests.

Offer-holders who notify the College of needs that might entail major adjustments (for example in terms of time or resources) will be invited to visit the College before the start of term to discuss what arrangements might be required.

In unusual or exceptional circumstances the College may wish to consult with other colleges, the DAS, and/or Graduate Accommodation Office about the possibility of alternative provision where the College cannot reasonably meet the necessary requirements. There is a procedure for migration between colleges in the [University Regulations](#). Migration is not an alternative to making reasonable adjustments and it can only happen with the consent of the student and both colleges.

Responding to students with specific access requirements

Notification of any adjustments required related to either teaching or accommodation must be made to the Student Support Officer. It is the responsibility of the Student Support Officer to ensure that any such requests are addressed in accord with the relevant legislation, frameworks, guidance and regulations.

Students with specific access requirements may disclose or make requests at any point. The College will inform offer-holders and students that it is in their interests to make disclosures as early as possible, but their requests will be treated no differently if they choose not to do so.

Notification of specific access requirements should be made by the individual student, preferably in writing and following a meeting with the Student Support Officer. A student may be accompanied by a parent/guardian.

On being informed by a student (or parent/guardian of student) of a disability that might require adjustments to accommodation and/or facilities, or on receiving a request for such an adjustment, the Student Support Officer (in consultation with the Disability Lead) will make an initial assessment. They will determine whether a case is either:

- major, requiring independent professional assessment and verification of needs and advice on meeting them, or
- minor, requiring self-assessment of needs and lying within the scope of routine adjustments

In major cases, the College will consult the Disability Advisory Service on the appropriate sources of professional advice and assessment. The student will be kept informed about the progress of the procedure.

Rooms will only be fitted out, as required, in response to individual student needs. Arrangements for bed and breakfast guests will be managed accordingly, typically using a proprietary 'clip-on' equipment systems. The managers note any requirements in initial correspondence and book students and guests in appropriate rooms within the accommodation whenever possible.

Reasonable adjustments

The College will make reasonable adjustments to meet the needs of disabled students. The definition of what is reasonable is provided by the Equality and Human Rights Commission (appendix 1). Examples of adjustments include the following:

- to cater for the needs of a student with a visual impairment would be the installation of a vinyl 'halo' in a contrasting colour around any white switches and sockets mounted on a white wall to increase the visual contrast to the required 30 points
- to cater for the needs of a student with a hearing impairment, a vibrating pillow alarm will be provided. The alarm will be connected to the fire alarm system and is designed to wake a person in the event of the fire alarm being activated.

The Student Support Officer will record requests using the form 'Requesting Reasonable Adjustments' (appendix 2), a copy of which will be made available to the student making the request following the assessment/decision.

The Student Support Officer will consult with the relevant College Officers and staff and keep a brief record of their discussions.

Consultation and assessment will proceed in as timely a manner as practical and reasonable; the student should be informed if there are any delays.

The assessment/decision will be communicated to the student by the Student Support Officer in writing. The student will be informed of the College's **Complaints Procedure** should they not be satisfied with the decision or associated action.

The Student Support Officer will inform the relevant College Officers or staff of the action to be taken in response to a request for reasonable adjustment, setting a timeframe for completion. The student will be informed if there is any delay.

The Student Support Officer will contact the student within no more than 4 weeks of the action being undertaken to establish whether the arrangements are satisfactory or not. If not, they will take the necessary steps to ensure that the adjustment is consistent with the assessment.

APR 22.2.19
